

## The Maintenance Matters Library

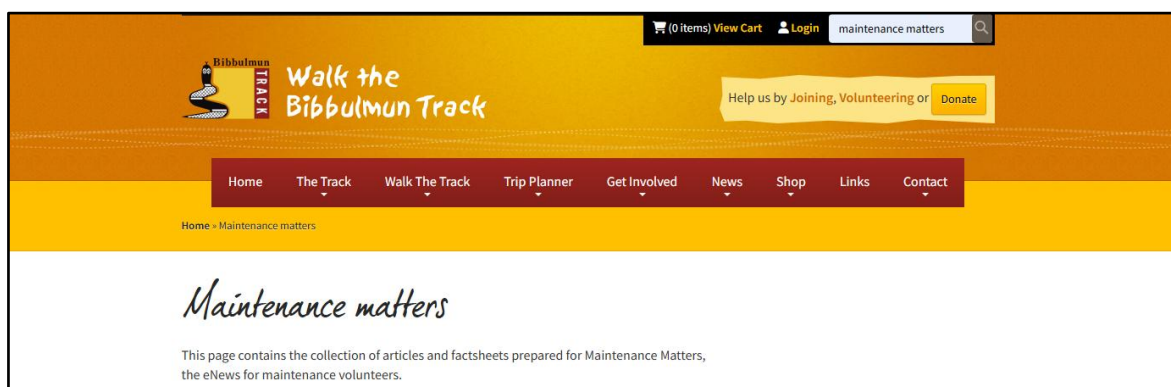

**Maintenance Matters** is an e-News and training resource, sent periodically to all maintenance volunteers.

The articles, factsheets and forms featured in Maintenance Matters are permanently available on a page on our website. You can refer to this library at any time, to add to your familiarity with our program and your role.

The page address (URL) is [www.bibbulmuntrack.org.au/maintenance-matters](http://www.bibbulmuntrack.org.au/maintenance-matters).

This page is 'hidden' – it's not included anywhere in the website dropdown menus. As indicated by the URL, it sits immediately behind the home page. However, you can access it by any of the following methods:

1. Following the link provided in each Maintenance Matters e-News you receive
2. Typing/copying the URL into your browser address bar
3. Bookmarking it for future reference
4. Use the search box on our website (top right corner of your PC/tablet browser window; unfortunately not available on phones).
  - a. Type in 'maintenance matters'.
  - b. The first option returned should be headed 'Maintenance matters'... click this.

The Maintenance Matters library is arranged by the same topics as the e-News:

- News
- Keeping in Touch
- Your Safety
- Track Maintenance Know-how
- Campsite Maintenance Know-how.

Each of the orange titles is a link which opens the associated document (mostly pdf's) in another browser tab.

Feel free to download any document for offline reference but be aware that they are periodically updated. Updates will usually be highlighted in subsequent **Maintenance Matters**, to alert you to any changes.
